Our Services...

We provide breath alcohol support services to Law Enforcement and Military agencies. We provide support for your program through Technical Supervisor contract and also maintain and repair your Intoxilyzer 5000, EN and 8000. Fondren Forensics Inc. is a factory authorized Intoxilyzer Service Center. You can send your instruments to us, or we will come to you for multiple instrument repairs and service.

We offer a variety of training seminars. Our courses are designed for the state's expert, police officer or others who routinely testify. Our training focuses on building skills necessary for becoming an effective witness in criminal trials.

In addition, we provide initial 40 hour breath test operator training to Law Enforcement and Military. We bring our training to your area. Please call for more information or check our website!

Thank you for the opportunity to serve you!

Effective Courtroom Demeanor

This is an 8 hour workshop designed to provide the tools necessary for improving testimony clarity, delivery and confidence. We do not teach you HOW to testify. We help you build on the strengths and knowledge you already have. Each student will gain life skills that will enable them to effectively and clearly relate information. This will allow them to overcome fears and insecurities about testifying in front of Judges and Juries.

Police officers, detention officers, and scientists are routinely asked to testify about their opinion or a set of facts. Often, these witnesses feel anxious when asked to testify. We understand that speaking in front of people can be very difficult. This course alleviates much of the anxiety associated with testimony by equipping the witness with tools they can use to relate their information in a clear and effective manner.

After successful completion of this 8 hour course, students are allowed to register for our 3 day advanced courtroom demeanor class. The advanced class is held periodically throughout the year as need arises.

Please call for more information. This training can be held at your facility or ours.
